OBS Studio

DOCUMENTATION 0.1.0

ACCESS OBS RECORDING/STREAMING
BENJAMIN@DIGITALSALMON.CO.UK

HOW TO
GET SET UP

CONFIGURE YOUR OBS STUDIO

1. Download and install OBS Studio

2. Create a new Profile (**Profile** | **New**)

3. Create a new Collection (**Scene Collection** | **New**)

4. Create a new Scene (**+** Button under **Scenes**)

5. Configure your Source

6. Open Settings

7. In Output, set your Recording/Streaming, Path, Format, Quality.

8. In Video, set your resolution and FPS.

9. For fixed length videos, set up your Output Timer (Tools | Output Timer)

CONFIGURE UNITY

1. Locate your OBS Studio installation **bin directory**

   (C:\Program Files (x86)\obs-studio\bin\64bit)

2. Right click **obs64** | **Create Shortcut**

3. Move your shortcut to just outside your **Assets** folder (Next to Library, ProjectSettings etc)

4. Rename the shortcut to **obs64** (The extension is .lnk, but this will likely be hidden).

If you wish to use a different directory, you can change the **ObsShortcutFilename**, **ObsInstallPath**, or

AbsoluteObsPath in code through the **DigitalSalmon**.**OpenBroadcastStudio** class.

ACCESS THE API

Open the **ObsExample** script in the **InterfaceOBS** folder.

All functions and configuration are accessed through the **DigitalSalmon**.**OpenBroadcastStudio** class.
